ABOUT ME

Full Stack Developer & Tester & Team Leader

WORK EXPERIENCE

2024 – CURRENT Plzen, Czechia

Software developer SPORK

Finally focusing more on the Back-end and the Czech language, Cooperating with a Czech team, Building a mobile application using React Native, Also learning and using many new tools and technologies such as Docker, NodeJS, pnpm, Firebase, Google Cloud, Saga, Swagger, Axios, And TypeScript.

2020 – 2024 Prague, Czechia

Front End Developer HCL

As a Front End Developer, proficient in HTML, CSS, Less, Sass, Bootstrap, JavaScript, React, AngularJS, SQL, and SEO, I was responsible for a variety of tasks aimed at creating engaging and responsive user interfaces. My role encompassed the following activities and responsibilities:

- **User Interface Development**: Develop visually appealing and user-friendly interfaces using HTML, CSS, and JavaScript frameworks like React, And AngularJS.
- **Responsive Design**: Ensure seamless user experiences across different devices and screen sizes by implementing responsive design principles and frameworks like Bootstrap.
- **Styling and Theming**: Utilize CSS preprocessors like Less and Sass to efficiently manage stylesheets, maintain consistency, and facilitate easier theming.
- **Component Development**: Build reusable and modular UI components to streamline development processes and enhance code maintainability.
- **Interactive Data Visualization**: Implement interactive data visualizations using libraries like D3.js, allowing users to explore and understand complex datasets effectively.
- **Front-End Frameworks**: Leverage front-end frameworks such as React, AngularJS, and JQuery to create dynamic and interactive web apps.
- **SEO Optimization**: Implement SEO best practices to improve website visibility and ensure optimal search engine rankings, including proper HTML markup, metadata, and content optimization.
- **Database Interaction**: Integrate front-end interfaces with backend databases using SQL for data retrieval, storage, and manipulation, ensuring seamless data flow and application functionality.
- **Third-party Integration**: Integrate third-party applications and services like Service-Now, Qlik Sense, Collibra, and Salesforce into web applications, ensuring smooth interoperability and functionality.
- **Version Control and Collaboration**: Utilize version control systems like GitHub to manage the codebase, track changes, and collaborate effectively with team members on projects.
- **Issue Tracking and Project Management**: Utilize tools like Jira to track project progress, manage tasks, and collaborate with cross-functional teams, ensuring timely delivery of high-quality solutions.
- **Performance Optimization**: Identify and address performance bottlenecks in front-end code to improve page load times, optimize rendering, and enhance overall user experience.
- **Continuous Learning and Skill Enhancement**: Stay updated with the latest trends, tools, and technologies in front-end development, continuously improving skills and adapting to evolving industry standards.
- **Manual QA**: Testing Web and Mobile applications using Lambda test, Serenity, and Cypress & writing test cases based on requirements using TestCase studio.

By effectively carrying out these responsibilities, I contributed to developing robust, scalable, and user-centric web applications that meet both technical requirements and end-user expectations.

*The most used tools and technologies in this project: React, Git, JIRA, AWS, Salesforce, Qlik Sense, Collibra.

2018 – 2020 Prague, Czechia

Business Intelligence, UI/UX Developer Menzies Aviation

With collaborating within BI teams, I have specialized expertise in BI tools such as Qlik Sense. My proficiency extends to leveraging D3.js for crafting dynamic charts fueled by real-time data, demonstrating a solid grasp of data visualization principles.
Furthermore, I possess hands-on experience with CSS libraries and frameworks including LESS, SASS, and Bootstrap. These skills empower me to design and implement visually compelling and responsive user interfaces that enhance the overall user experience.

*The most used tools and technologies in this project: AngularJS, D3.js, Git, Service-Now, Qlik Sense.

2014 – 2017

Web Developer Freelance

Work with colleagues and clients form different places in the world.
* Leading a small team.

*The most used tools and technologies in this project: HTML, CSS, JS, JQuery, Bootstrap, Git.

EDUCATION AND TRAINING
