Home: Prague (Czechia)

ABOUT ME

Full-Stack Developer (Front-End Specialization) with **8+ years of experience** building responsive web and mobile applications.

Specialized in **React/React Native** ecosystems with recent backend training in **Node.js, Docker, and cloud services**. Proven track record in delivering scalable solutions for Czech and international clients. Fluent in English, Czech, and Arabic.

Currently building a full-stack React Native application, implementing real-time features and cloud deployment. Passionate about creating intuitive user experiences and solving complex technical challenges across the stack.

Proactively integrating **AI tools** like **GitHub Copilot** into my workflow to boost efficiency and code quality.

SKILLS

Frontend

React / React Native / JavaScript (ES6+) / TypeScript / HTML5 / CSS3 / Bootstrap / D3.js / Redux / Redux Saga / Axios

Backend & Databases

Node.js / Express / REST APIs / Swagger / SQL / Firebase

Cloud & DevOps & Modern Tools

AWS Cloud / Google Cloud / Docker / Postman / CI/CD / Git / npm / Qlik Sense / GitHub Copilot / AI Assistants

Languages

English (C2) / Czech (B2) / Hebrew (C2) / Arabic (Native)

WORK EXPERIENCE

Prague Info | **2025-Present** – Prague, Czechia

Web & Mobile Developer

- Developed and maintained the company **website** and **mobile application**
- Implemented **responsive designs** and optimized user experience for client-facing platforms
- Collaborated with the sales team to provide technical demonstrations and **solution architecture**
- Utilized **full-stack** development skills to support both technical and business objectives

SPORK | **2024-2025** – Plzen, Czechia

Software developer

- Developed mobile applications using **React Native** with **TypeScript** for Czech market
- Implemented state management using **Redux Saga** for complex application flows
- Containerized applications with **Docker** and deployed to **Google Cloud Platform**
- Collaborated with backend team using **Swagger** for API documentation and **Axios** for HTTP requests

Front End Developer

- Developed and maintained **5+ responsive web applications** using React.js for pharmaceutical clients, supporting **10,000+ monthly users**
- Built reusable UI components with **Bootstrap**, reducing development time by **20%** for similar features
- Integrated **SQL database** connections to create dynamic data visualizations for clinical reporting dashboards
- Optimized site performance, improving **PageSpeed scores from 65 to 90+** through code splitting and asset optimization
- Provided **technical support and iterative updates** based on user feedback from **50+ global stakeholders**

Business Intelligence, UI/UX Developer

- Developed interactive data visualization dashboards using **Qlik Sense**
- Created custom dynamic charts with **D3.js** for real-time flight/operations data
- Translated business requirements into technical specifications for BI tools
- Improved data reporting efficiency

Web developer

- Led small international teams developing **WordPress** websites for **global clients**
- Managed **full project** lifecycle from requirement gathering to deployment
- Delivered **7 successful projects**

PROJECTS

Bageterie Boulevard Corporate Ordering Platform | Full-Stack Application | 2025

- Developed a private B2B web app for corporate food ordering at preferential rates
- **Frontend:** Built with **React.js**, featuring a responsive design and an intuitive order workflow
- **Backend:** **Node.js/Express** API, handling order processing, authentication, and business logic
- **Key Features:** Automated **PDF invoice generation** using **Puppeteer**, email notifications (Resend)
- *(Private application – architecture overview and code samples available upon request)*

PROFESSIONAL DEVELOPMENT & TRAINING

Full-Stack Development Track | Self-Directed Learning | 2014-Present

- **Frontend Mastery:** React & React Native advanced patterns, TypeScript, state management (Redux/Context)
- **Backend Expansion:** Node.js, Express, REST APIs, authentication, and server-side architecture
- **Cloud & DevOps:** AWS services (EC2, S3), Docker containerization, CI/CD pipeline implementation
- **Databases:** SQL optimization, Firebase real-time database, data modeling
- **Additional Technologies:** Angular framework, testing methodologies, performance optimization
- **AI & Developer Tools:** Prompt engineering, GitHub Copilot integration, AI-assisted debugging

Google Cloud Associate Cloud Engineer | 2024

Salesforce Marketing Cloud Certified | 2023

QA Manual Testing Certification | 2022

Additional: Continuous learning through Udemy, Coursera, and official documentation.

Currently focused on advanced cloud deployment strategies.
